Dear Students and Faculty members,

Are you or is someone you know an early-stage postgraduate and late-stage undergraduate student? If so, you are invited to apply for the **PRACE Summer of HPC 2016** programme, which will be held in July & August 2016. The program consists of a training week and two months on placement at top HPC centres around Europe, the programme affords participants the opportunity to learn and share information about PRACE and HPC, and includes accommodation, a stipend, and travel to their HPC centre placement. The deadline has been extended to 19 February 2016! Click here to apply <https://summerofhpc.prace-ri.eu/>!

If you don't meet the criteria for the Summer of HPC programme, don't worry! You might be more suited to the **International Summer School on HPC Challenges**! Graduate students and postdoctoral scholars from institutions in Europe, Canada, Japan and the United States are invited to apply for the seventh International Summer School on HPC Challenges in Computational Sciences, to be held June 26 – July 1, 2016, in Ljubljana, Slovenia. The expense-paid program will benefit advanced scholars from European, Canadian, Japanese and U.S. institutions who use HPC to conduct research. Interested students should apply by February 15th, 2016. Meals and housing will be covered for the selected participants, also travel from outside Europe. Applications from graduate students and postdocs in all science and engineering fields are welcome. Click here to apply <http://ihpess2016.hpc.fs.uni-lj.si/>!

If you have any questions, contact Ioannis Liabotis: iliaboti@grnet.gr
